

VIKAS KANNAUJIYA

Senior Software Engineer | Bangalore, Karnataka | +91-8318727487
vikaskannaujiya207@gmail.com | linkedin.com/in/vikas-kannaujiya0821

Professional Summary

Results-driven Senior Backend Engineer with 2+ years of experience designing and scaling fin-tech and banking platforms. Specialized in Node.js, Express.js, MongoDB, MySQL, and AWS Cloud, with strong expertise in microservices architecture, RESTful APIs, GraphQL, serverless functions, and Docker/Kubernetes deployments. Proven track record of reducing API latency by 30%, building secure digital KYC and fraud prevention systems, and maintaining 99.9% uptime in production. Skilled in CI/CD pipelines (Jenkins/GitHub Actions), Redis caching, and Agile/Scrum methodologies. Proficient in leveraging AI tools (ChatGPT, Claude) and Prompt Engineering to optimize development workflows, automate documentation, and accelerate solution design.

Key Projects & Contributions

PSB Alliance - Doorstep Banking Platform

- ✓ Engineered real-time transaction processing system with 99.9% uptime and sub-500ms response times. Implemented SLA tracking and structured complaint resolution, boosting efficiency by 40%.
- ✓ Automated data synchronization and reporting via cron jobs, removing 100% manual intervention. Reduced response times by 30% through Redis caching and query optimization.
- ✓ Strengthened API security with OAuth2 and JWT, ensuring compliance with banking standards.

Central Bank of India - Extended KYC Services

- ✓ Built automated periodic KYC update system, processing 10,000+ bookings daily.
- ✓ Integrated UIDAI biometric Aadhar authentication (fingerprint/iris), ensuring 100% compliance.
- ✓ Strengthened API security with OAuth2 and JWT, ensuring compliance with banking standards.

Bank of Maharashtra - Contact Point Verification (CPV)

- ✓ Developed a Contact Point Verification system validating phone, email, and physical addresses.
- ✓ Built bulk processing engine handling 5,000+ verification requests daily.

Skill Set

- Technical: Expert in Backend and Frontend development
- Tools: Visual Studio Code, Git, Github, PM2, Postman, WinSCP
- Testing and Monitoring: Playwright, Unit Testing, Winston Logger, SLA Tracking, Code Review
- Languages and Databases: Node.js, JavaScript (ES6+), Golang, SQL, React, MongoDB, MYSQL, Redis, GridFS, HTML5, CSS, Express.js
- AI Tools & Technologies: ChatGPT, Claude, Prompt Engineering, OpenAI API

Employment Summary

Organization	Designation	Period	Work Location
Integra Micro Systems (P) Ltd.	Senior Software Engineer	July 2025 - Till date	Bangalore
Integra Micro Systems (P) Ltd.	Software Engineer	July 2023 - June 2025	Bangalore

Trainings and Certification

- ✓ Complete NodeJS Developer (GraphQL, MongoDB)
- ✓ JavaScript Algorithms and Data Structures
- ✓ Go: The Complete Developer's Guide (Golang)
- ✓ MERN stack developer

Roles and Responsibilities

Company	Integra Micro Systems (P) Ltd.
Role	Senior Software Engineer
Period	July 2025 - Till Date
Responsibilities	✓ Automated Cron Jobs: Developed and maintained scheduled cron services for bulk booking creation, ensuring large-scale data processing at predefined intervals with improved efficiency and minimal manual intervention. ✓ UIDAI Integration: Implemented Aadhaar-based biometric authentication (fingerprint/iris) through UIDAI APIs, enabling secure, real-time KYC verification compliant with government data security standards. ✓ Contact Point Verification (CPV): Built verification services for validating customer contact details (phone, email, address) to strengthen due diligence and fraud prevention mechanisms. ✓ Photo Capture & Storage: Designed a secure photo capture and retrieval module using MongoDB GridFS, enabling scalable and compliant storage for customer verification images.

Roles and Responsibilities

Company	Integra Micro Systems (P) Ltd.
Role	Software Engineer
Period	July 2023 - Jun 2025
Responsibilities	✓ Real-Time Transactions: Built a pan-India doorstep banking platform ensuring high availability and low-latency transaction processing. ✓ SLA & Grievance Management: Developed SLA tracking and automated complaint resolution systems to enhance service efficiency. ✓ Microservices Development: ○ Cron Services: Automated data sync, reporting, and maintenance tasks. ○ Notifications: Integrated FCM-based push notifications and email alerts. ○ Logging: Centralized structured log collection using Winston and RabbitMQ. ✓ Performance & Security: Optimized API response times with Redis caching and secured endpoints using JWT and OAuth authentication.

Education Summary

<u>Qualification</u>	<u>University/College</u>	<u>Percentage/CGPA</u>
Bachelor Of Technology(Electronics Engineering)	Madan Mohan Malaviya University Of Technology	72.3
Diploma in Electronics Engineering	BTEUP	80.23
H.S.C	St. Andrew's Inter College	73.4
S.S.C	Saraswati Inter college	72.5

PersonalSummary

- ✓ Languages Known: Hindi (Native), English (Advanced)
- ✓ Gender: Male
- ✓ Nationality: Indian
